# High Vollage Training Management Level

This is to certify that:

Name: Smajic Ervin Date of birth: 03.07.1976.

has succesfully completed a program of approved training required to:

Manage high voltage systems

and has meet the requirements laid down in:

The Knowledge, Understanding and Proficiencies for High volinge installations set out in REGULATION 111/2
of the International Convention on Standards of Training, Certification and
Watchkeeping for Seafarers, 1978, as amended and has also met the additional criteria specified
in the STCW Convention, applicable to the issue of this certificate. The training program has been approved
by the Republic of Slovenia, Slovenian Maritime Administration.

The training program has been also approved by Bureau Veritas Maritime/Offshore Division in line with requirements laid down by the International Convention on Standards of Training, Certification and Walchkeeping for Seafarers, 1978, as amended.

This course also meets the requirements of STCW Code B-III/2 and the shipboard high voltage training guidelines and is aimed at Marine Engineering Officers who may be expected to supervise and/or implement on board high voltage switching operations as an Authorised Person.

## Structure:

- International requisites for high voltage knowledge Advantages of high voltage sylvins
   Hazards and immediate actions under fault combitions The functional operational and safety requirements
   for a marine high-voltage system High voltage equipment on board
- High voltage sajety rules Safe working procedures Protective devices Assignment of qualified personnel
  to carry out maintenance and repairs of high-voltage switchgear of various types High voltage electrical
  equipment testing methods Performing test of institution resistance and polarization index
- High voltage equipment maintenance Taking remedial actions necessary during faults Producing a switching strategy for isolating components of a high-voltage system Selecting suitable apparatus for isolation and testing of high-voltage equipment Carrying out a switching and isolation procedure on a marine high voltage system, complete with safety documentation Conductance test performed on all electrical equipment Schemutics understanding Proving the system dead Earthing and discharging Work permits
  - Re energizing the system SP6 and vacuum breakers operating principles Replacement of switchgear
